

6160RF

Custom Alpha Display Keypad with Integrated Wireless Transceiver

The 6160RF Custom Alpha Keypad with Integrated Wireless Transceiver offers the unbeatable combination of convenient features and competitive value in a single, quick-install package. The integrated design solves the trickiest installation challenges by easily adding 5800 wireless devices to any compatible VISTA® control panel—without additional wiring or sacrificing zones, while also reducing installation time and costs. By adding the 5828 or 5828V wireless keypad to a VISTA control panel system presents a tremendous up-sell opportunity and offers a secondary wireless keypad.

The attractive white console blends with any décor and features a contoured, removable door that conceals illuminated soft-touch keys. The 6160RF also features a large, bright 32-character display with easy-to-read status messages. The oversized function keys are easily accessed even when the keypad door is closed, and can be programmed for fire, burglary, personal emergencies and other applications. Colored self-adhesive labels are included.
