Operating Humidity: Up to 95% RH (max), non-condensing

Compatibility: Compatible with all 5800 Series wireless receivers and transceivers

Agency Listings:

FCC

ETL Listed; US and Canada (Tested to UL 634 and ULC C634 standards)

IC

5800RPS Installation Tips

Step
1

Measure and Drill for Plunger

Use a 3/4" drill bit to drill into the door jamb to a 1 1/4" depth.

Step
2

Drill for Antenna

A 1/4" hole must now be drilled in the center of the cavity through the door jamb. This is so the antenna can be inserted through the door jamb frame and the supporting studs.

Step
3

Slide on Straw

Slide the antenna into supplied antenna guide (straw).

Step
4

Place and Set

Insert Switch and Antenna into the door jamb.

**It is important to always keep the antenna straight. Never cut or coil up the antenna. You may fold the antenna in half if space is a concern. This may affect range.*
